CAUTION

"To ensure the best experience and safety while using our candles, please follow these care and safety guidelines:"

1. Never Leave Unattended: Always extinguish the candle before leaving the room or going to sleep. A burning candle should never be left unsupervised.
2. Keep Away from Children and Pets: Ensure the candle is placed in an area inaccessible to children and pets to prevent accidents or injury
3. Use on Heat-Resistant Surface: Place the candle on a stable, heat-resistant surface to prevent the risk of fire or damage to furniture.
4. Trim Wick Before Each Use: Before lighting the candle, trim the wick to approximately 1/4 inch to promote an even burn and minimize soot buildup.
5. Avoid Drafts and Flammable Objects: Position the candle away from drafts, vents, curtains, and other flammable objects to prevent accidental ignition.
6. Mindful Extinguishing: Extinguish the candle using a snuffer or gently blow it out. Avoid using water to extinguish as it can cause hot wax to splatter.
7. Wait for Cooling: Allow the candle to cool completely before moving it or relighting it to prevent burns or spills

thank you
